Background of the WISH project

The WISH project is the UK Government’s flagship programme to scale up its support to integrated sexual and reproductive health and rights (SRHR) services in a range of countries across Africa and Asia by 2021. It represents 20% of the UK Governments’ FP2020 commitments.

There are two ‘Lots’ implemented through different consortium structures. Marie Stopes International (MSI) leads the WISH Lot 1 consortium. The sub-contractors are IPPF, DKT, Ipas, THINKPLACE, Options, and Leonard Cheshire Disability.

IPPF will be delivering WISH1 through a multi-million pound subcontract in the following 6 countries through its Member Associations (MAs): Cameroon, Chad, Côte d’Ivoire, DRC, Mauritania and Nigeria. For the four countries highlighted in italics, the MAs will be the sole service provider for the entire consortium.

WISH aims to deliver deep and sustainable multi-country improvement in Africa linked to the following four key outputs:

- **Individual Choice** - Strengthening individual knowledge and choice, and building community support for SRHR;
- **National Ownership** - Driving sustainability and national ownership of SRH programmes;
- **Access to services** - Improving access to and expand choice of voluntary FP and other SRHR services;
- **Global Goods** - Increasing women’s choice and access to SRHR services through evidence-based innovations and best practice.

Goals and scope of work

The WISH Lot 1 project has ambitious goals to achieve within 3 years. WISH is a restricted funding and Payment by Results (PBR) contract. This means that some of the funding depends on if the MAs reaching Key Performance Indicators (KPIs):

- **CYPs:**
  - All partners: 7,148,176
  - **IPPF MAs:** 783,800
- **Additional Users:**
  - All partners: 1,100,000
  - **IPPF MAs:** 168,809
- **Youth** - minimum of 5% of FP users are under 20 per country + 15% across the consortium,
- **Poverty** - number of FP clients living in poverty. This is calculated in parity with annual national headcount, with data collected through client exit interviews,
- **Sustainability** - achievement of sustainability measures set across the consortium.

The teams

IPPF.

The IPPF project management team is based in London, at the IPPF Central Office.
The MAs.

6 IPPF MAs will take part in the WISH1 project. Their objectives under WISH are:
