

Condom Vending Machines

Get to know:

- Suitable manufacturers of condom vending machines
- Suitable payment gateway
- Suitable locations

Watch out for:

- Resource availability
- Geographically appropriate locations to install the machines
- Means to raise awareness

Challenges:

- Technical failures
- Obtaining permission from the authorities to install the machines
- Social stigma and taboo around the use of contraceptives

Recommended to:

- Conduct pilots and test runs on each machine prior to the launch at each location

Highlights

Smart Condom Vending Machines of the Family Planning Association of Sri Lanka

- Main source of income is generated by selling condoms and lubricants using vending machines
- 10 vending machines are installed across Sri Lanka in public spaces
- An extensive promotional campaign supports the initiative on social media

Good to have:
Reliable suppliers and human resources with expertise in marketing and branding
