National Action for Financing: Post-2015 advocacy entry points and opportunities

In 2015, substantial changes are proposed to the present development financing architecture. This presents both threats and opportunities for the availability of funding for reproductive health (RH) supplies and sexual and reproductive health and rights (SRHR) at the global, regional, national and subnational level.

With support from the Reproductive Health Supplies Coalition (RHSC) Innovation Fund, IPPF is implementing the National Action for Financing (NAF) project to work with stakeholders to position funding for RH supplies as a critical element in the new development financing architecture. This publication provides a calendar of main financing events upcoming in 2015 to enable stakeholders to understand the advocacy entry points and opportunities to help influence decision-making, increase funding and improve access to RH supplies and SRHR. Enclosed is a list of upcoming financing events, and suggested actions for advocates to call for the inclusion of RH supplies and SRHR. A small table of past events in 2015 is included for reference and background. It is important to note this document’s criteria for ranking events: Number and level of participants; importance of outcome documents/declarations as potential reference documents for the international development community.

Within the list of upcoming events, IPPF would like to draw specific attention to three particular events upcoming included in this document, with suggested actions:

- **October 18-21, Mexico City: Global Maternal Newborn Health Conference**
  - Suggest advocates approach listed local stakeholders (see table) working on health/RH in Mexico to (jointly) advocate for increased domestic and international funding for RH supplies, in the context of this conference.
  - Approach Dr. Mickey Chopra (speaker – mchopra@unicef.org), Chief of Health at UNICEF and member of GFF working group, to discuss opportunities for RHS under the GFF.

- **29 Nov. – 4 Dec 2015, Harare, Zimbabwe: ICASA - International Conference on AIDS and STIs in Africa**
  - Ally with CWGH to bring across broader health messages, beyond HIV + advocated for integrated HIV/RH approach.
  - Form new alliances with HIV/AIDS community to jointly explore implementation possibilities of Post-2015 indicators related to HIV and RH

- **30 Nov. – 11 Dec, Paris: COP21 – Paris Climate Change Conference:**
  - Refer to report recommendations and messages on the importance of RH supplies for sustainable development and management of resources/climate change.
  - Contact youth/gender constituency focal points and work in partnership with youth/Gender organisations registered for the event to take these messages forward.
  - Advocate for climate funding to be invested into RH supplies and SRHR.

- **Final draft** available [here](#).
- **Actions:** Refer to the following most relevant goals of draft for future RH supplies advocacy:

**Goal 3. Ensure healthy lives and promote well-being for all at all ages**

3.1 By 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births  
3.2 By 2030, end preventable deaths of newborns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1000 live births and under-5 mortality to at least as low as 25 per 1000 live births  
3.3 By 2030, end the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, water-borne diseases and other communicable diseases  
3.4 By 2030, reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being  
3.7 By 2030, ensure universal access to sexual and reproductive health care services, including for family planning, information and education, and the integration of reproductive health into national strategies and programmes  
3.8 Achieve universal health coverage, including financial risk protection, access to quality essential health care services and access to safe, effective, quality and affordable essential medicines and vaccines for all  
3.c Substantially increase health financing and the recruitment, development, training and retention of the health workforce in developing countries, especially in least developed countries and small island developing States

**Goal 5. Achieve gender equality and empower all women and girls**

5.2 Eliminate all forms of violence against all women and girls in the public and private spheres, including trafficking and sexual and other types of exploitation  
5.4 Recognize and value unpaid care and domestic work through the provision of public services, infrastructure and social protection policies and the promotion of shared responsibility within the household and the family as nationally appropriate

| 16 July 2015 | Adoption of the FfD outcome document at the FfD Addis Ababa conference | Addis Ababa, Ethiopia | - **Outcome document** available [here](#).  
- **Actions:**  
  - Refer to the following most relevant FfD paragraphs for future RH supplies advocacy:  
    - **12. Delivering social protection and essential public services for all.** To end poverty in all its forms everywhere and finish the unfinished business of the Millennium Development Goals, we commit to a new social compact. In this effort, we will provide fiscally sustainable and nationally appropriate social protection systems and measures for all, including floors, with a focus on those furthest below the poverty line and the vulnerable, persons with disabilities, indigenous persons, children, youth and older persons. We also encourage countries to consider setting nationally appropriate spending targets for quality investments in essential public services for all, including health, education, energy, water and sanitation, consistent with national sustainable development strategies. We will make every effort to meet the needs of all communities through delivering high-quality services that make effective use of resources. We commit to strong international support for these efforts, and will explore coherent funding modalities to mobilize additional resources, building on country-led experiences  
    - **41. We are committed to women’s and girls’ equal rights and opportunities in political and economic decision-making and resource allocation and to removing any barriers that prevent**
women from being full participants in the economy. We resolve to undertake legislation and administrative reforms to give women equal rights with men to economic resources, including access to ownership and control over land and other forms of property, credit, inheritance, natural resources and appropriate new technology. We further encourage the private sector to contribute to advancing gender equality through striving to ensure women’s full and productive employment and decent work, equal pay for equal work or work of equal value, and equal opportunities, as well as protecting them against discrimination and abuse in the workplace. We support the Women’s Empowerment Principles established by UN-Women and the Global Compact and encourage increased investments in female-owned companies or businesses.

- **OUTCOME:** Discussions to feed into G7 presidency (Germany) priorities and actions.  
- **ACTIONS:**  
  - Approach business women represented at the meeting to explore possibilities of jointly advocating for RHS as a tool for women’s economic empowerment and participation in the labour market (see report messages).  
  - Refer to G7 outcome, which launched an initiative on Women’s Economic Empowerment, proposed by the German Presidency. The focus of the initiative is professional qualifications and entrepreneurial activity by women: By supporting the UN’s Women’s Empowerment Principles, the G7 is underlining the important role played by the private sector in creating an empowering environment. The Principles were launched in 2010 by UN Women and the UN Global Compact 2010. Businesses can sign up to them, thus making a commitment to empower women. With the communiqué adopted in Elmau the G7 are calling on businesses to take account of these Principles in their work.  
  - Contribute to work and position papers of VENRO’s working group on health, regarding the G7 German presidency priorities on

| 25-27 September, New York. | UNGA Post-2015 Summit | Heads of State UN member states | Health: Fighting infectious diseases, **improving child and maternal health**, and **strengthening health care systems** are key concerns of the G7. The German government has put the issue of increasing antibiotic resistance and the prevention and treatment of neglected and poverty-related diseases on the agenda of the summit. The German government will also scale up its contribution to Gavi significantly, to a total of up to 500 million euros by 2020. Ebola: The BMZ is making important contributions (over 100 million euros) to emergency measures and has overall responsibility for medium- to long-term reconstruction and preventive measures on the ground.
